

Official Mission Statement of the United Makers Association

The United Makers Association is a worldwide organization comprised of makers from every kind of building background. Our goal is to create a streamlined Association that welcomes anyone who builds regardless of how long they have been building for and what their current experience level is. We also strive to promote makers who have a lot of talent but do not get the level of attention that they deserve. This goal in particular drives our movement because we have seen first hand how much talent there is in the world and that it needs to be seen. This has pushed us to create an organization that is not only involving makers of all kinds, but is also not limited to a single platform. Our Multiplatform system has proven to be extremely effective in getting our makers content in front of a massive audience and in turn getting our makers more of a following on all their social media accounts. With our Multiplatform organization currently including Instagram, Facebook, Youtube, Reddit, Twitter, Tiktok, Discord and our main website which is currently being constructed, our makers have the freedom to join on any of the above platforms of their choosing. This also enables makers to connect with other fellow makers across all platforms listed so that they can share ideas, become inspired and become actively involved in the community. The United Makers Association will always promote kindness, safety and creative thinking across all of our platforms so that we can inspire and promote the next generation of makers across the world.

Nikolai Vadala, President of the UMA-
